

DIA PoP - IP Transit

Flexible. Scalable. Secure.

High-capacity, reliable fiber optic transport and connectivity solution.

Nationwide, Large-scale, Bandwidth Solution.

DIA PoP (IP transit) with Windstream Wholesale enables high-capacity connections to Tier 1 providers and CDNs, supplying low-latency internet access to downstream customers - an optimal service solution for large-scale bandwidth needs.

Providing direct connectivity to our IP backbone, DIA PoP ensures reliable and secure Internet service. We have decades of experience meeting the significant capacity demands from the world's biggest content distributors, international carriers, ISPs, service providers, electric coops and data centers - and we built that backbone with the capacity and intelligence to handle demand and avoid network congestion.

Our fiber and network assets allow us to operate a fully scalable, reliable, and diverse network environment. A competitively priced alternative to local exchange providers, IP transit customers can also extend service with our Wavelength Services or leverage their existing transport.

Whether accessing the Internet or cloud networking services, improving widespread collaboration efforts or connecting remote locations across the country - if you need large pipes to connect customer traffic to the rest of the internet, DIA PoP is the solution.

Connection & Support - When & Where You Need It.

- ✓ 60+ PoPs across 29 states
- ✓ PoP based bandwidths from 1Gbps to 100Gbps network
- ✓ Extend and diversify your coverage via our Nationwide fiber optic network
- ✓ Fully support IPv4 and IPv6 domains states
- ✓ Streamlined, secure quoting and ordering portal
- ✓ Fixed or burstable billing
- ✓ BGP routing included with no extra charge

Carrier Grade SLA

We back our offering with a carrier grade SLA that defines and provides guarantees for:

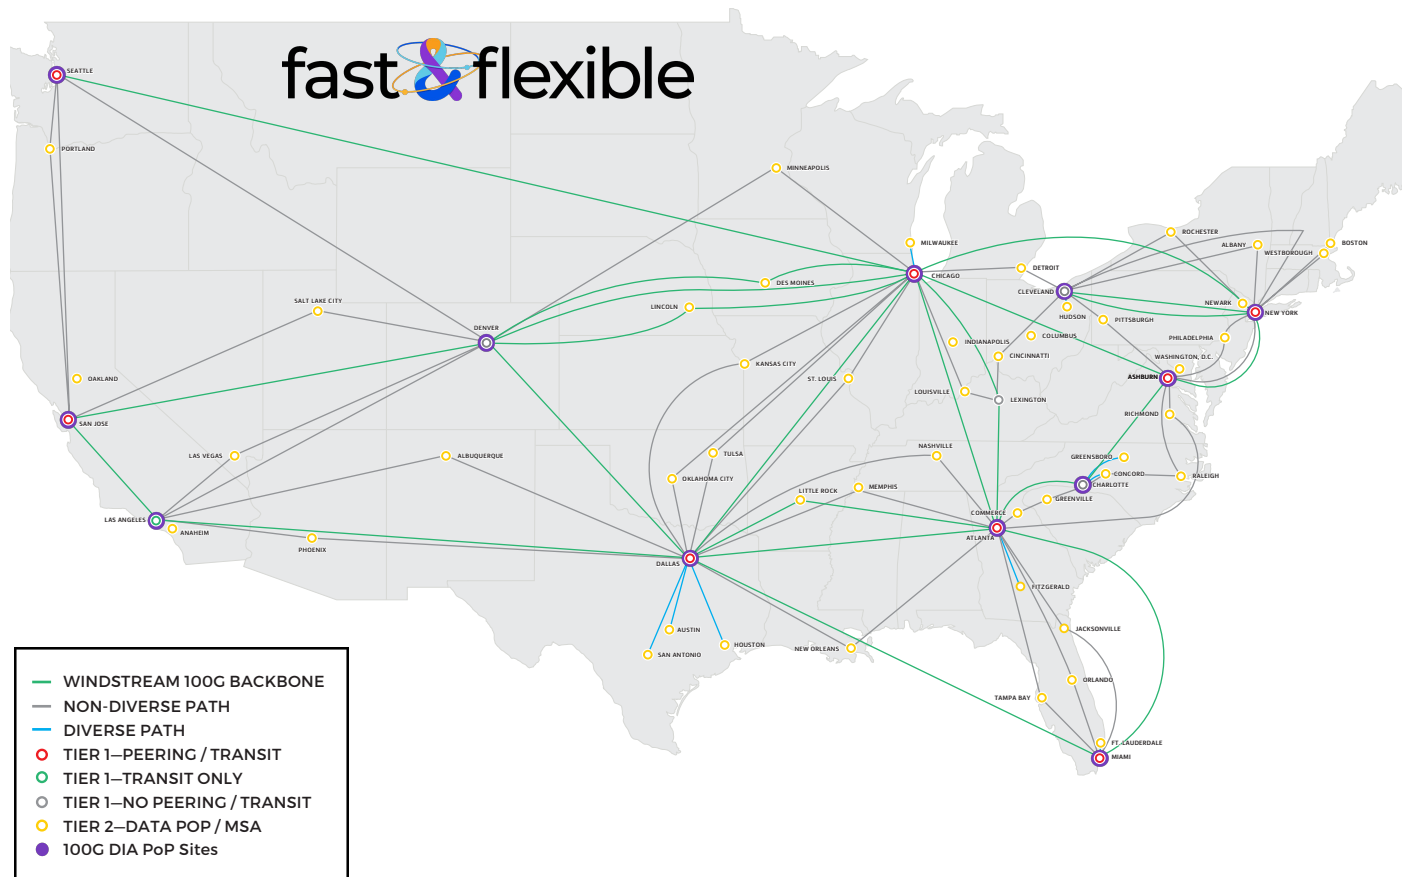

- ✓ Availability
- ✓ Low latency
- ✓ Packet loss
